

# Press Release

**FriendTech introduces the "World's First" Wireless HomeDock for the iPod, PSP, MP3 Player and Walkman Music Phone. It's a true versatile design for leading portable consumer electronics, notably the iPod and PSP.**

Taipei, Taiwan, MAY 9, 2006 – FriendTech, an innovator in technology that provides peripherals dedicated to enriching the digital lifestyle while keeping it user-friendly, continues to roll out the innovation with the iDea HomeDock. The new iDea HomeDock allows iPod and PSP users to get excellent audio and video playback while recharging their devices at the same time. The HomeDock comes in 2 versions which are wired or wireless; it is compatible with the entire iPod line, PSP, MP3 player and MP3 mobile phones -- 4 platforms together, a smart and stylish **"One for All"** design.

The iDea Wireless HomeDock is the only wireless dock that broadcasts music from the iPod, PSP and MP3 player/ MP3 phone to the connected home/office stereo; it is capable of sending music wirelessly to multiple room stereos and headphones with receivers simultaneously.

Both versions of the HomeDock offer stellar performance when it comes to audio and video through supported home entertainment devices. It's no ordinary docking unit, for it provides never-seen support for a range of platforms. You'll love how these compact docks give you everything you need to keep up with today's digital lifestyle. Both units feature the following:

- Connection to home stereo, TV, mixers, A/V receivers, and recorders for supported devices
- Gives audiophiles the best quality sound from all dockable iPod's with our unmatched multiple connector and stylish Apple adjuster (even supports iPod shuffle)
- USB 2.0 connection for iPod synchronization via iTunes on PC and MAC
- Plays iPod videos on large screen TV via AV connection or S-Video
- Doubles as a charger and an Audio player for the PSP
- Charges iPod\PSP at once while simultaneously playing back A/V
- MP3 players and Mobile MP3 enabled phones playback with extended cable
- Control the iPod with the sleek, 16 button functional Remote with 3 unique needed features never seen in the iPod remote control unit.

This is the **"All-in-One"** support package for your portable devices. All iTunes audio for your iPod and audio files for your PSP can now all be played through your stereo. It also has iPod video and photo play back for televisions through composite or S-Video so you can watch your podcasts, shows or movies at home, in the office, or on the go. With the option of wired or wireless and a universal design that no other product can promise, the HomeDock also comes with a unique Remote Control Unit that supports the iPod Click Wheel's "Scroll UP" "Scroll Down" controls and the **"MENU"** button. Even the genuine iPod Remote Control Unit can not do this. Our iDea 16-button functional remote control comes with both iDea HomeDock versions.

“The iDea Wireless HomeDock presents the Best value in the home entertainment!” said Paul Hu, CEO and founder of FriendTech. The extended feature set of the Wireless iDea HomeDock include:

- Supports the Dolby Digital 5.1 Surround Sound via the Hi-Fi output and connected A/V amplifier.
- Wireless RF HD-Audio Transmitting and Broadcasting customized for the iPod, with Cool skin design
- Displays the A/V output on the living room connected TV and stereo, it broadcasts the High Definition (HD) Audio Wirelessly to all room stereos throughout your house (a receiver is needed for each)
- The ONLY Wireless Dock that supports the "Night Listening\*" mode - It playbacks iPod/PSP Audio and displays the iPod photo/ video on the connected Home Stereo and TV. (\*Night Listening : Because the Wireless Dock supports the Wireless Broadcast, you may dim the TV and Hi-Fi volume to keep it quiet outside; yet still enjoy the music through the self-amplified Wireless HD-Audio headset.)
- Blazing Broadcasting on FriendTech's new iDea line consisting of but not limited to:
  - [iDea Wireless HD-Audio Receiver](#)
  - [iDea Wireless Hi-Fi Portable Receiver](#)
  - [iDea Wireless Hi-Fi Headset](#)

The iDea HomeDock contains everything needed to connect all dockable iPods, the Sony PSP, and MP3 devices to a home stereo and/or TV in one simple package. It all starts right here with FriendTech's new Homedock series and its revolutionary design. It is a true experience of transforming the leading portable consumer electronic devices into a piece of your home entertainment system. Included in the package is the dock of your purchase, an AC power adapter, RCA cable, 2.5mm and 3.5mm extension cables, USB A/B cable, stylish Apple stand, our unique 16-button IR remote control, and an option of one of our iDea line Receiver accessories for the wireless version.

The iDea HomeDock will be priced at **\$99.95** with the Wireless iDea HomeDock at **\$149.95**, and your wireless dock purchase entitles you to choose your favorite iDea wireless accessory!! Pre-orders will be available soon and shipping will begin early June.

### About FriendTech Computer Co., Ltd.

FriendTech was established in 1987, as a professional PC motherboard manufacturer. In 1994, FriendTech switched its major business from motherboards to CPU Upgrades to serve the after market. With more than 11 years of experience, FriendTech has become the leader in the field of PC and Gaming Upgrades under its trademarks of PowerLeap and FriendTech. Today, the company is widening its product line into the mobile gadgets and home A/V center devices, upgrades and accessories field under the "iDea" brand name. The company's aim is to provide the digital lifestyle with a goal of friendly usage. We welcome OEM/ODM distributor/reseller inquiries. Please contact us for further information.
