- The Car Charger provides stable and pure +5V voltage for the iPod, it has the safety fuse protection circuitry built-in.
- **EAN Code: 4711671021619**

## Getting Started:

- Put two pieces 1.5V AAA batteries in the battery compartment.
- Press the power ON button, it'll enter in the "Transmit mode", the LCD shows the current transmit frequency.
- Press ▲ or ▼ button to increase or decrease adjusted frequencies. Press ON/OFF button once again to stop transmit and the current time will be showing on the LCD display.
- To store the preferred channels (up to 3 channels), press down the M1, M2 or M3 button for about 3 seconds to get it memoried. To use the stored channels, press M1, M2 or M3 button again, and it will show up.
- LCD Display with Backlight - Display FM frequency, Temperature, Time and Battery status.
- Change TIME: press and hold SET button for about 3 seconds to enter the Setting mode, the number of the minute will flash, press ▲ or ▼ button to set the number, press SET button to confirm. Repeating this procedure to set up the minute and hour. The LCD will show the time after let alone for about 3 seconds.
- Automatically power off after standing by two minutes.
